

Blower 1,5 kW

Blower 1.5 kW: suitable for larger bouncy castles and inflatables

It always makes sense for rental companies to include extra blowers in their product ranges for those occasions when your customer needs an extra blower, one happens to be broken, or has just been rented out. This is a perfect back-up option to have available in your collection. This top blower is suitable for most bouncy castles and other inflatable attractions.

The blower capacity is 1.5 kW.

A powerhouse for all inflatables

This 1.5 kW blower from the JB collection can also be used to easily inflate larger bouncy castles and inflatables, and to keep them properly inflated with a constant air supply. In addition, its noise level of about 86 dB makes the blower quiet. It is light as well, approximately 15 kilogram.

If you are after options for inflating smaller bouncy castles and/or inflatables and keeping them inflated with a constant air supply, we can also recommend our 1.1 kW blower. You can find it [here](#).

A 1-year warranty on our premium quality blower

As you have come to expect of JB-Inflatables, we always go for the best products. Not only does this apply to our attractions, but also to our tools - like this blower. We confidently provide you with a 1-year warranty for this item.

JB: 15 year, 15,000 enthusiastic customers

JB has been in business for 15 years now. For 15,000 people around the world, we have delivered items to help people celebrate festive occasions. Our team of designers, developers and logistic staff want to make it a unique experience for everyone. And with us you are always assured of our service and high-quality delivery! It is for good reason people call us 'creators of greatness'!
