

If you, as a rental company, include Skydancers in your product range, you may want to have a number of blowers in stock for these dancing tubes. It goes without saying JB-Inflatables' product range includes special blowers all equipped to be used for Skydancers. The beautiful thing about them is that they can all be equipped with LED lighting, while you can also choose to use regular lighting to highlight the object when it is dark. It goes without saying the blower can also be used for Skytubes.

The blower capacity is 950 Watt.

The blower produces 88dB sound

#### Convenience all around

This special blower for Skydancers and Skytubes is connected to the mains supply and has a frequency of 50 Hz. With its 4.5 cm diameter and weight of about 16.5 kilograms it is a very useful piece of equipment that is easy to handle.

The Skydancer blower fan motor has 1.25 HP with 2860 rpm.
