

Blower REH-3E

Water-resistant blower REH-3E: especially for large attractions

When you rent out large inflatable attractions and bouncy castles in particular, it is wise to keep several suitable blowers in stock. Because you never know in which circumstances you may need one! This REH-3E blower is particularly suitable for large rental objects, and to keep them properly inflated with a constant air supply.

The blower capacity is 2.8 kW.

Extensively tested, ready to withstand heavy rain

Not only does this powerhouse have a higher air output than an average blower with the same wattage, but it is practical as well: stackable and lightweight. The main advantage: the blower is splash proof! Numerous tests have shown that the REH-3E is perfectly capable of withstanding wet climates - it is resistant to even the heaviest of rains.

Quality and therefore excellent guarantees

The robustness and reliability of this blower is unique. That is why JB confidently provides a 1-year warranty for this device, which will make this an even better addition to your rental product range.

JB: 15,000 enthusiastic customers in 15 years

JB-Inflatables has been in business for more than 15 years now and during those years we have made over 15,000 people around the world happy. That is exactly what our team of designers, developers and logistic staff set out to do! And with us you are always assured of our service and high-quality delivery! It is for good reason people call us 'creators of greatness'!
